HTML and CSS practical assignment

Create a website with HTML and CSS. Create:

1. A home page with that has a picture of yourself and a brief profile of yourself. Your professional history, current life and future aspirations.
2. Create an about us page of your tech company.
3. Create two blog posts about two achievements of your company.
4. Create a form for visitors who want to join your company(name, age, email, telephone number, skill, qualification…. And any other information you find necessary.)
5. You should have all the pages linked together and be able to move from any page to any page.

You are free to be as creative as you want and to use any other tools/technologies you want.

The assignment is due 11th Feb 11.59pm.
